Observations from the project: (1/2)

- **Technical requirements at normal level**
- **Lot of attention to safety, quality and reporting**
 - Need to understand – enough engineering personnel
 - Must be in the consideration also in work progress
- **Lots of interfaces**
 - Communication and reporting in center
 - Need to learn the processes

Observations from the project: (2/2)

- **Multicultural environment**

- Many languages – differences in skills
- English main language – official project language
 - Must keep everybody involved – no separate groups
 - Extra attention to instructions – to be sure!
- Different cultural backgrounds
 - Must be taken to consideration
 - Respect for everybody – no prejudices

Thank you for your attention!
